SUMMARY

UI/UX Designer with a Computer Science degree, specializing in e-commerce and content-heavy digital products. Experienced in optimizing browse-to-purchase journeys, building scalable design systems, and designing responsive interfaces across web and mobile. Combines user research with technical feasibility through close collaboration with development teams.

SKILLS

UX: User Research, Usability Testing, Information Architecture, User Flows, Wireframing, Heuristic Evaluation, Customer Journey Mapping.
UI: High-Fidelity Mockups, Prototyping, Design Systems, Responsive & Mobile-First Design, RTL/LTR Localization, Interaction Design
Tools & Workflow: Figma (Tokens, Variables, Auto Layout), FigJam, Developer Handoff, Cross-functional Collaboration, Agile/Scrum

WORK EXPERIENCE

Freelance | UI/UX Designer **Jan 2025 - Present**

- Streamlined a fragmented content workflow for an educational institute by conducting stakeholder interviews, resulting in a unified admin dashboard design across 20 screens.
- Designed the UI for a Quran app and built its design system, converting structured methodologies into reusable RTL components using Figma tokens and variables.

Ulom for Research & Development | UI/UX Designer (Volunteer) **May 2025 - Dec 2025**

- Designed a role-based dashboard from scratch across 15+ screens, giving admins, reviewers and writers separate views so writers could publish an article through one clear, step-by-step flow.
- Delivered the public landing page, optimizing visual hierarchy to improve user engagement and conversion CTAs.
- Conducted post-launch heuristic evaluations to audit the live product, delivering a prioritized UX improvement plan focused on navigation and visual consistency for the dev team.

Coffee Souq | E-commerce UI/UX Specialist (Part-time) **Oct 2024 – Jul 2025**

- Redesigned the product page of a live Salla store and rewrote each product's description around its own details, so customers could find and compare key information more easily.

PROJECT

Naham — University Cafeteria Ordering App

- Designed an ordering app by mapping user journeys to build 3 core flows (login, ordering, tracking). Validated the interface through qualitative usability testing with 7 participants to refine the process.

Jarir Bookstore App — UI/UX Redesign

- In a 5-person bootcamp team, built the user personas from our research and designed the product page, merging specs, warranty and reviews into one section and adding colour and storage options.

Vexora - 7-Day MVP Product Build

- Sole designer on a 7-day hackathon team: designed an AI-powered dashboard as an interactive high-fidelity prototype, which the team's developer then built.

EDUCATION

Computer Science | Bachelor’s degree, Jubail Industrial College **2024**
UI/UX Design | Bootcamp, Tuwaiq Academy **2024**

CERTIFICATION

Google UX Design Certificate **2026**
Foundations of Behavioral Science | Columbia+ **2025**
STEP English Test | 81/100 **2025**
